

# Ultimate Employability Skills Programme

**Our award-winning programme, just got even better**

**Are you ready to support young people to be better prepared for the world of work?**

**If 'Yes', by partnering with us you can help improve the prospects of young people and benefit your own organisation.**

EmployabilityUK is an award-winning charity with a track record of helping to transform outcomes for young people by providing bespoke programme-based interventions that address individual needs. Working in cities and towns across the country in partnership with local employers, volunteers and education organisations, we identify place-specific issues and tailor our employability and life skills solutions to help improve prospects aged 16-18 and 18-21 plus.

The Ultimate Employability Skills Programme is a tailor-made programme designed to enhance the life skills and work-readiness of young people, and it supports the missing pieces often lacking in their recruitment and development. Learners gain transferable employability skills that are relevant to all career paths and aspirations, regardless of their chosen pathway to work. Learners join interactive and motivational face-to-face workshops, engage with industry professionals and leaders, and even get opportunities to volunteer and gain work experience.

## **Programme information**

Endorsed by NCFE, the programme consists of 14 sessions - 12 core modules and 2 Wild Cards tailored to specific learner and organisational needs delivered by professional facilitators and with the support of dedicated coaches from a range of career backgrounds. Guest speakers are invited from the organisations involved in delivering and sponsoring the programme, enabling them to directly engage with the participants and provide further development opportunities. Learners also get access a wide range of digital resources to continue their learning.

Partnering with EmployabilityUK to deliver the programmes can bring a wide range of benefits for an organisation, including boosting their ESG responsibilities, accessing talent pipeline, providing volunteering and development opportunities for employees, reputation and PR, and making a tangible contribution to the local community.
